

WATER HEATER EXTENDED WARRANTY

Typically, manufacturer warranties cover failed parts but not **repair labor**. This extended warranty includes: **labor, parts, and tank replacement**, giving protection from unpleasant circumstances.

Our Service:

- ✔ Unit and Labor Coverage
- ✔ No Deductable
- ✔ Peace of Mind
- ✔ Fully Transferrable Policy
- ✔ We Do The Work

Why Choose Us

Water heaters and their parts are costly. Additionally, the cost of labor makes homeowners uneasy when choosing a long-term product, knowing they'll have to pay more for a complete new install or a replacement part when/if they break.

Our solution takes the burden of those expenses off the homeowner in a simple, scalable and up-front cost.

Terms and Conditions:

*Annual maintenance is necessary to uphold the validity of the warranty. Failure to adhere to this requirement will result in the nullification of the warranty. To ensure automated compliance, consider enrolling in either version of My Georgia Plumber's Home Care Club Membership programs (condition from My Georgia Plumber: must renew membership each year, one year from enrollment).

**Extension of warranty is based on and is an extension of the manufacturer's six-year warranty and is guaranteed for up to ten years of coverage if all maintenance requirements have been met (see previous section). The warranty is guaranteed from the manufacturer's date of installation and can extend up to ten years. Parts and tank coverage commences in the seventh year, extending the manufacturer's six-year warranty to ten years. Labor coverage is provided for the entire ten-year period, though it may not encompass all required repairs or replacements. Other conditions may apply as set by My Georgia Plumber or JB Warranties.
